

## Biosecurity Checklist

<b>Biosecurity Planning</b>	
	<b>Establish "Controlled Access Zone" and "Restricted Access Zone" for the farm</b>
	<b>Establish "Line of Separation" and access points</b> <ul style="list-style-type: none"> <li>- Biosecurity signs should be posted at each entry/exit point</li> <li>- Consider most appropriate location for access point C&amp;D stations based on access to pressurized water for cleaning vehicle tires etc</li> </ul>
<b>Equip C&amp;D stations at the access point</b>	
	Clean water source for removing debris from vehicle tires
	Disinfectant solution for disinfecting vehicle tires, equipment, and other items needing to cross the access point
	Logbook for all visitors, employees and service providers to sign
	Hand sanitizer
	Boot wash or spray bottle with disinfectant
	<b>Personal protective equipment</b> for service providers that will be in contact with animals or raw milk
	Disposable gloves
	Disposable boot covers or site provided footwear
	Disposable coveralls or site provided coveralls
	Medical Masks or N95 respirator
	Face shields or safety goggles (can be decontaminated for re-use)
<b>Set-up PPE disposal station at the milk house</b>	
	Garbage bag for used PPE
	Containers for re-usable PPE that can be decontaminated (sanitized PPE should be place in Ziploc bags and returned to C&D station)
	Disinfectant solution for milk truck driver to disinfect milk transfer hose and equipment after milk pick-up (ie. backpack sprayer)
<b>Other</b>	
	Daily checklist for restocking C&D Stations and PPE Disposal Stations
	Daily cleaning checklist for the milk house and external sidewalks
	Establish designated area and guidelines for decontaminating PPE, footwear, and coveralls

Daily Checklist for C&D Stations and PPE Disposal Station	
Equip C&D stations at the access point	
	Check water source for removing debris from vehicle tires
	Check and refill disinfectant solution for disinfecting vehicle tires, equipment, and other items needing to cross the access point
	Take a picture of logbook for all visitors, employees and service providers to sign
	Check and refill hand sanitizer
	Check and refill boot wash or spray bottle with disinfectant
Replenish Personal protective equipment	
	Disposable gloves
	Disposable boot covers or site-provided footwear
	Disposable coveralls or site provided coveralls
	Medical mask or NIOSH approved respirator (N95 mask)
	Face shields or safety goggles (can be decontaminated for re-use)
Equip PPE disposal station at the milk house	
	Remove and replace garbage bags for used PPE
	Check containers for re-usable PPE that can be sanitized (sanitized PPE should be place in Ziploc bags and returned to C&D station) *Optional
	Refill Disinfectant solution for milk truck driver to disinfect milk transfer hose and equipment after milk pick-up
Re-Useable PPE Sanitization	
	Decontaminate re-usable PPE and place in Ziploc bags.
	Decontaminate used footwear
	Wash and dry soiled coveralls
	Return sanitized PPE to C&D Station

Daily Cleaning Checklist for Milk House	
	Clean and disinfect sidewalks
	Dispose of garbage and remove/replace garbage bags
	Clean and disinfect milk house floors and surfaces
	Clean and disinfect external surfaces of bulk tank and ladder
	Clean and disinfect hand washing facilities.
	Restock soap and paper towel at hand washing facilities as needed
