

School Milk Program

Dear Parents,

Our school is considering starting a school milk program. Milk plays an important role in growth and development, and to overall healthy eating. The calcium and vitamin D found in milk are crucial during the peak bone building years of childhood and adolescence.

The approximate cost will be \$_____ for a 250ml carton of white milk and \$_____ for a 250ml carton of chocolate milk.

For a school milk program to be offered in our school, we need one or two volunteers to help run the program. These duties include keeping track of orders and payments and coordinating student milk monitors who will distribute the milk at lunch or recess.

In order to help us determine whether or not we can run a milk program, please indicate your interest below, and return this slip by_____.

Sincerely,

Principal
